Summary

Frontend and mobile engineer with 6 years of experience building React, Next.js, React Native, and TypeScript applications for travel, healthcare, e-commerce, and government platforms across the MENA region. Currently building a bilingual hotel-booking mobile app for iOS and Android. Shipped bilingual Arabic/English interfaces with full RTL support, a government web service used by 3M+ people, and enterprise apps serving 600K+ users. Comfortable working across the stack with Node.js, .NET Core, and FastAPI, and focused on performance, SEO, and maintainable component architecture.

Skills

- **Frontend:** TypeScript, JavaScript, React, Next.js (App Router, SSR/SSG), Redux Toolkit, React Query, Tailwind CSS, Styled Components, HTML5, CSS3
- **Mobile:** React Native, Expo (Expo Router), Zustand, TanStack Query, Reanimated, payment gateway integration (HyperPay), Google Sign-In
- **Localization:** Arabic/English i18n, RTL layouts, Arabic-digit formatting
- **Backend & APIs:** Node.js, .NET Core, Entity Framework, Python, FastAPI, FastMCP, REST, GraphQL, PostgreSQL
- **Testing & Tooling:** Jest, Vitest, React Testing Library, Playwright, Storybook, Git, GitHub Actions CI/CD, Webpack, Vercel
- **Practices:** Performance optimization, technical SEO, reusable component libraries, Agile/Scrum

Work Experience

Software Engineer | Bisan Travel

Cairo, Egypt | Oct 2026 - Present

- Develop **Rehlte**, a bilingual (English/Arabic RTL) hotel-booking mobile app for iOS and Android, using React Native, Expo, and TypeScript.
- Own the payment, booking-management, and account modules, including card payments with 3-D Secure through HyperPay and OTP-based verification.
- Improve app performance and stability on Android and resolve QA issues in close collaboration with the backend team.

Software Engineer | Softera

Remote | Sep 2024 - Jul 2026

- Developed healthcare and e-learning web platforms with React and Next.js, delivering key modules for authentication, appointment scheduling, and course management.
- Built bilingual Arabic/English interfaces with full RTL support and reusable component architecture.
- Deployed and maintained production releases, monitored analytics, and resolved bugs, applying secure handling of sensitive health data.

Software Engineer | Vidills

Remote | Sep 2022 - Aug 2024

- **TryGrip**: built frontend features that improved user experience and performance, integrating REST and GraphQL APIs.
- **KPTC** (Kuwait): developed modules and data synchronization for an enterprise web application.
- Built reusable React components and managed application state with Redux Toolkit.

Software Engineer | Procoor Solutions

Cairo, Egypt | Jan 2022 - Nov 2022

- Developed and maintained Procoor PM and Procoor FM, project- and facility-management web apps serving 600K+ users, increasing engagement by 95%.
- Resolved 97% of critical frontend issues, significantly reducing downtime.

- Helped move the team to Agile workflows, cutting delivery cycle time by 50% and raising completion rates by 80%.

Software Engineer | Military Records

Cairo, Egypt | Oct 2020 - Dec 2021 | Mandatory military service

- Built and launched the Identity Document Application (C# ASP.NET MVC), a government web service used by 3M+ people, reducing application processing time by 30%.
- Improved system efficiency by 45% through frontend optimization and streamlined record-processing workflows.

Projects

Rehlte | Travel

Technologies: React Native, Expo, TypeScript

- Bilingual hotel-booking app for iOS and Android with secure in-app payments, trip management, and user accounts. Currently in QA ahead of launch.

Awafi Clinic | Healthcare | awaficlinic.com

Technologies: React, TypeScript

- Saudi remote mental-health and family-medicine platform. Built appointment booking, patient workflows, and validated healthcare forms with full Arabic/English RTL support.

Sakenah Academy | E-Learning | sakenah.com

Technologies: Next.js, React, FastMCP

- Mental-health training platform. Built a reusable course architecture, integrated REST APIs, optimized SEO and performance, and exposed platform APIs as tools with FastMCP.

Al Fagala | E-commerce | alfagala.com

Technologies: Next.js, React

- Online store for an Egyptian sanitary-ware retailer with search, filtering, cart, checkout, and cash-on-delivery, using server-side rendering and technical SEO.
